CONCRETE COMPACTION TABLES

**PATENTED LIVE TOP TABLE WITH UNIFORM, EVEN
VIBRATION THROUGHOUT THE TABLETOP
BUILT WITH ADJUSTABLE SPEED AND FORCE**

VIBCO's patented "Live Top" table was designed by VIBCO engineers to eliminate the dead spot normally found in the center of standard vibrating tables. So, whether the product is large or small, the vibration is uniform and even. Level stiff mixtures in seconds, maintain uniform mixtures with minimal air bubbles.

Ideal for tile, pathstones, swimming pool coping and more!

VIBCO's "Live Top" table is equipped with a Model US-900 or Model US-1600 High Frequency Electric Vibrator (115 volt). It's ready to plug into any standard electrical outlet and draws only 5 amps maximum. Supplied with variable speed controller to change from 1 to 10,000 maximum speed. Rated for intermittent duty only. Overload protection in the on/off switch protects the vibrator from overload. Handy foot switch leaves hands free to handle the product. Inflatable rubber shocks installed for adjusting the amplitude and vibration transfer through the stand to the floor.

Standard Table Top Size	Vibrator	Max. Product Wgt. on Table	Model No.
24 x 24	US-900	350	4USRD9
30 x 30	US-900	300	6USRD9
30 x 30	US-1600	350	6USRD 6
36 x 36	US-900	250	9USRD9
36 x 36	US-1600	350	9USRD 6
48 x 48	US- 600	350	6USRD 6

LARGE “LIVE TOP” TABLES

- Even vibration throughout the table top
- Pneumatic or electric operation
- Add on a table

Ideal for all types of concrete work . . . curb stones, panels, door frames and more!

For longer products, add on a table to make it 2x8 or 2x12. Run one table for shorter products and two tables for longer ones.

STANDARD TABLE DIMENSIONS: 2x4, 2x6 or 2x8 (with or without casters)

Available with electric or pneumatic power to meet your product specifications. Consult a VIBCO technician for recommendations.

**CONCRETE COMPACTION TABLES MADE BY
THE SAME PEOPLE WHO MAKE YOUR VIBRATORS**
